

365 Healthcare have a comprehensive range of gowns, they can advise you on the material type and level of protection suitable for your clinical needs.

The gowns are available in 2 materials, and complete range of protection levels;
SSMMS a polypropylene blend construction with layers of melt and spun-blown material fibres

- Excellent fluid and particulate barrier
- High level strength and absorbency providing a sound surgical bacterial barrier
- Lightweight for maximum comfort
- Ultra sonically melded seams
- Breathable fabric

This is the most popular, widely used type of gown as it provides a quality, cost effective gown solution

Super Lite and Lite Gowns

- Features lighter weight SSMMS material
- Pale blue colour
- 2 levels of protection; reinforced and standard
- Offers a low cost alternative for low fluid procedures

All 365 Gowns feature;

- ✓ Hook and loop fastening at the neck to ensure secure and easily adjustable fit
- ✓ Soft, elasticated fabric cuffs for extra comfort
- ✓ Side tie-fastenings for accessibility
- ✓ Overlap sterile back with adjustable hook and loop fastening for hygiene
- ✓ GS1 barcode on pack and outer case
- ✓ Fully Compliant with EN 13795*

365 gown outer cases are colour coded for ease of identification in the theatre store rooms;
 STANDARD = BLUE, REINFORCED = RED, IMPERVIOUS = GREEN, PURPLE = LIGHTWEIGHT
